Always fun and a real test of the 160 meter station. Wish I could be here to do this every year. Conditions about what we would expect for our newly found sunspots, but there were some surprisingly good signals from EU at times. The band started getting noisy around 10 or so, and seemed to get progressively worse from then on.

Did manage to get 45 EU stations in the log, an AK, XE, CE, a few in the Carrib and 2 KH6.
